

Exciting News

New President at Lockrey Manufacturing

I am pleased to announce the appointment of Don Vollmar as President and CEO of Lockrey Manufacturing. Don has been an employee over 14 years and was the reason Lockrey added its fabrication capability in the early 1990's. Previously Don was the plant manager at Fab Steel and recently fabrication plant manager and product manager at Lockrey.

I will continue as trustee of our ESOP and profit sharing plans and remain on the Board of Directors. I will still be involved in the business in a strategic and consulting function. The balance of my time will be spent in some of the community projects for which we are involved.

Transition of management in a small company is a difficult step. Don brings continuity of management philosophy, familiarity of existing customers, and new energy essential for growth. I am very confident he will continue our pattern of success in manufacturing and product development.

- Mark Makulinski

It is with great pride that I accept the challenge of President and CEO of Lockrey Manufacturing. With each step since his purchase in 1977, Mark has raised the expectations, performance, and results of a modern manufacturing company. Having participated in this evolution for the last 14 years, I am confident we will continue to lead our industry. The opportunities are different today but are abundant and extend around the world. This is an exciting time to be in manufacturing.

In our new world quality has become a given, no exceptions. We have refined our ISO 9001-2000 quality/management system to be the foundation that will support our growth. We will now embark on a path of top down decision making based on data generated within our system. We have completed internal process audit training and are developing specific quality agenda triggers to be addressed at management levels. We are committed to action on these results to better serve our customers and ourselves.

Another focus will be lead time reduction. We are very good at value added activities but have need for improvement in continual flow and throughput. We intend to identify our less than lean opportunities using value stream

mapping. With the data generated, we will act on the most obvious with each event contributing to our continuous improvement.

Technology has and will continue to play a major role in our growth. We have specified and ordered our first machine integrated touch off, tool recognition, check and perfect system. We will increase our use of robotics and are investigating vision systems. New machine purchases will be made with throughput, multi-axis, and advanced automation considerations.

Customers, the foundation that gives the above purpose, will be our driver. Our commitment levels will rise with each internal improvement. High expectations lead to success and I expect a lot. I look forward with great excitement to our continuing relationships.

-Don Vollmar

Office Update

New Office Personnel

There are plenty of good things happening in the Lockrey Office. Now that the dust has settled, and our new people have their feet firmly planted underneath them, we are extremely happy with the team we have in place.

We are proud to announce the addition of Stacy Smith as the newest member of our customer service department. Stacy was previously part of our administrative support team. She has the luxury of joining a department that is built around nearly 20 years of combined experience with Gary Taylor and Mark Schramm.

As a team we are charged with exploring new ideas that will better facilitate production and improve on-time delivery by

sharpening our focus on process improvement. We completed process audit training in August and internal audits begin in October. Future efforts continue as our team will be heavily involved with planned value stream mapping events. Our first goal is to reduce down time between value added activities to shorten lead times. We, along with all Lockrey associates, look forward to better serving customers through continual improvement.

- Rich Hanus, Office Manager

PARTNER COMPANY NEWS

Competitor's Edge Receives Endorsements, Positive Feedback

We are proud to announce that our patent-pending **ShotMatic R² Rim Reducer, R³ Rebound Trainer and Post^{Up}Pole** are currently being used at several high profile, nationally ranked, NCAA Basketball Programs as well as several local area high schools. Throughout the past quarter, our marketing group has been afforded several positive comments and endorsements regarding the benefits of the product line and its impact on basketball players.

Jerry Krause of Gonzaga University, Chris Adams, former President of the Ohio High School Basketball Coaches Association and current head coach at Northwestern Ohio University and Dave Schlabach of Berlin Hiland High School leading his teams to 2000, 2005 & 2006 State Championships, have endorsed the **ShotMatic R² Rim Reducer, R³ Rebound Trainer and Post^{Up}Pole**. All agree, the **ShotMatic R² Rim Reducer, R³ Rebound Trainer and Post^{Up}Pole** will train basketball players to shoot with proper form, develop correct muscle memory and build shooting confidence. Objectiveness to these endorsements include some teams reporting over a 35% improvement in scoring after just 2 weeks of use!

AIMCO Sales Soar!

Sales for July 2006 were up more than 50% from July 2005. We are looking forward to a successful 2007. AIMCO is officially up and running on Gorbels Website as a recommended end effectors supplier. We currently have a 4 1/2 star rating out of 5.

For more information please visit: www.Gorbels.com

Our successful distributor training seminar has reignited interest in AIMCO products. The distributors who attended the seminar were impressed with the infrastructure and Lockrey's capabilities. AIMCO has received numerous inquiries from over ten of the groups who attended and we look forward to the next event in January 2007.

Favorite Vacation: Smokey Mountains

Sports Teams: Ohio State Buckeyes and Miami Dolphins

Pets: Cat name Hazel — always had dogs as pets until recently...What a difference!

Favorite Quote: A dime holding up a dollar

RECREATION / CHARITY EVENTS

Bunches of Boats and Bikes in 2006 !

The Annual Great Maumee River Dragon Boat Festival took place July 29, 2006 at International Park in Downtown Toledo. Once again, Lockrey associates assisted with a donation and enjoyed volunteering their time. This event helps raise funds for Partners in Education, a non-profit organization that develops and fosters partnerships between area schools and northwest Ohio businesses, government agencies, organizations and churches.

For more information about the Great Maumee River Dragon Boat Festival, visit the Toledo Partners in Education website www.PartnersToledo.org

The Reeves Northrup Memorial MS Bike to the Bay rolled off at the Lucas County Recreation Center June 24th and 25th. This enduring bike tour raises money and awareness for Multiple Sclerosis. The Lockrey team consisted of experienced and new riders. The hours of riding can be grueling, but the stroll over The finish line is an immediate,

self-rewarding accomplishment. Bike to the Bay is a very important fundraising event as millions of people suffer from this debilitating disease. The Lockrey team rode a whopping one thousand six hundred and fifty eight miles and raised over 4 thousand dollars. Great Job! What a proud achievement !

Check out www.NationalMSSociety.org

******* RELAY FOR LIFE *******

"Relay For Life" took place June 3rd & 4th at the Monroe County Fairgrounds in Monroe, Michigan. It was a fun, overnight relay event that celebrated Cancer survivorship and helped raise money for the American Cancer Society.

Lockrey Manufacturing lost a valued Machinist to cancer, Dave Gearing. Dave had worked at Lockrey for over eleven years. A number of Lockrey associates have also been affected in some way by cancer, proving this to be a worthwhile event that was rewarding as well as successful.

**** ALZHEIMER'S MEMORY WALK ****

The Alzheimer's Memory Walk took place September 24th at the Toledo Zoo. More than 32,000 people in NW Ohio have Alzheimer's disease which affects more than 4.5 million Americans.

The walk raised awareness about the Alzheimer's Association and proceeds went directly to the Northwest Ohio Chapter to provide critical educational activities, fund research and support services.

For more information regarding Alzheimer's and The Alzheimer's Association please call 419-537-1999.

Concepts2MARKET offers a partnership to product companies who can benefit from our extensive manufacturing expertise and business experience. We can combine your current market position with our unique capabilities and produce a market leader. Our approach to sharing risk and reward allows our partners access to a world class manufacturing and engineering facility at little or no cost. These up front costs are crucial in a company's ability to succeed in the marketplace.

Our relationship can take any number of directions depending on your wants and needs. c2M has bought 100% of product companies from owners looking for an exit strategy to establishing manufacturing contracts with little exchange. Our partnership process usually proceeds in different phases:

1. Investigation of product suitability related to our manufacturing capabilities
2. Definition of product strengths and limitations related to it's market
3. Determination of latest manufacturing techniques to improve product function, appearance and reduce cost
4. Fashion a working relationship based on both our best interests

Our process is decidedly different because we share the risk and reward.

You don't need to worry about being led down an expensive manufacturing direction because of your source's limited capabilities.

You don't have to invest in costly equipment or tooling where you lack expertise.

c2M only succeeds if the products themselves succeed in the marketplace.

UPCOMING AREA EVENTS
